

# Girraween National Park

## List of Plant Species

Edited by Craig Robbins and Vanessa Ryan

Date this list was published: 16 November, 2011

This list is not necessarily complete, although it has been prepared with care and attention to detail; the list, like all plant species lists, is an ongoing work in progress and will change as new knowledge becomes available. We welcome and encourage any feedback, comments, amendments, corrections and additional species sightings or records.

This list has been compiled from:

- "Species List - Plant Life of Girraween National Park"; Booklet; State of Queensland, Queensland Parks and Wildlife Service; November 1999
- Queensland Herbarium specimen records, May 2011
- Wildlife Online Records with either more than 1 sighting  
OR 1 or more Specimens Recorded.  
[Data excluding Fungi: Extracted May 2011, Fungi: Extracted June 2011]
- Observations by National Park staff and park visitors.

Park Boundaries used were as they were defined in March 2011 (Qld Government).

All the plants listed here are common, except those given a conservation status code.

### Conservation status codes:

Introduced species	=	*
Near Threatened	=	NT
Vulnerable	=	V
Endangered	=	E

### Flags:

QH = The presence of this species has been confirmed by the Queensland Herbarium.

## **Acknowledgements:**

Many groups and organisations have contributed to the collective knowledge of known plant species within Girraween NP and this publication would not have been possible without their contributions, input and passion towards the Park and the flora of Australia. We would like to thank, in particular, the following people and organisations for their valuable contributions towards increasing the knowledge of the Park's flora, reviewing draft revisions of this list, or contributing by providing expert knowledge and guidance.

- **Queensland Herbarium** staff, associates and contributors;
- **Bill McDonald** (Queensland Herbarium) for reviewing a draft of the current list and providing names or clarification for some of the more obscure taxa present within the list;
- **Megan Thomas** (Queensland Herbarium, Plant Identification and Advisory Services) for advice, clarification of unknown plant names and support;
- **Mike Mathieson** (Queensland Herbarium) for his expert input regarding Orchidaceae, providing constructive feedback and a number of corrections;
- **Tony Bean** (Queensland Herbarium) for reviewing a draft of the current list and providing names or clarification for some of the more obscure taxa present within the list;
- **Jolene McLellan** (Girraween Public Contact Ranger, DERM Queensland Parks and Wildlife) for her support, guidance and sharing her expert local knowledge;
- **David James** (ANOS Kabi Group) for sharing his knowledge of orchids and helping to identify park species, as well as providing photographs of those species;
- **Glenn and Jenny Holmes** for providing us with a list of their specimens from the park;
- **Glenn Leiper** for his assistance with identifying some of Girraween's species from photographs, as well as providing a great many of those photographs; and
- **Michael Jefferies** and **Nanette Jurd** for their support and donation of photographs to this website which have helped confirm the existence of certain species within Girraween.

Although not necessarily participating directly towards this current list, there are a number of important contributors who have all added significantly towards the understanding and knowledge of Girraween National Park's flora. Compiling this list of known species has only been possible because of the effort of these contributors and collectors. We gratefully acknowledge each of them below.

Stanley Blake, Frederick Bailey, Cyril White, Lindsay Smith, Mary Clemens, Ellen Goebel, Bill Goebel, Hock Goebel, Max Gray, Les Pedley, John Williams, David Hockings, Jean Harslett, G. Ward, Ken Shea, C. W. Frazier, Ernest Constable, Ian Telford, Tom Ryan, Paul Grimshaw, Greg Roberts, Philip Sharpe, David Jones, Peter Young, Ralph Crane, David Halford, Paul Forster, George Batianoff, Colleen Gravatt, John Hunter, Peter Clarke, and Kym Sparshott.

If anyone has been omitted from this list, it was unintentional and we sincerely apologise.
